Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) An electronic text and/or graphics presentation device including:
 - scanning means arranged to scan a printed pattern encoding text and/or graphics of an entire document;
 - a-user input control means;
 - processing means coupled to the scanning means and ~~responsive to the user input control means and~~ the programming means operatively programmed to generate a data signal corresponding to the text and/or graphics in response to a control signal from the user input control means; and
 - a-display means ~~controlled by the processing means and arranged to receive the data signal from the processing means and display the text and/or graphics in response to the processing means.~~
2. (Original) An electronic text and/or graphics presentation device according to claim 1 including a foldable housing comprising first and second housing portions pivotal relative to each other.
3. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the first and second housing portions are each pivotally connected to a common spine.
4. (Original) An electronic text and/or graphics presentation device according to claim 3, wherein the spine includes a battery compartment.
5. (Currently amended) An electronic text and/or graphics presentation device according to claim 1, wherein the pattern is formed-printed on a card and said device includes a roller mechanism arranged to retract the card into said device.

3

6. (Currently amended) An electronic text and/or graphics presentation device according to claim 2, wherein the pattern is ~~formed~~printed on a card and said device includes a roller mechanism arranged to retract the card into said device.
7. (Original) An electronic text and/or graphics presentation device according to claim 6, wherein the roller mechanism is incorporated into the first housing portion.
8. (Original) An electronic text and/or graphics presentation device according to claim 7, wherein the first housing portion includes a window for observing a card retracted into the first portion.
9. (Currently amended) An electronic text and/or graphics presentation device according to claim 1, wherein the pattern encoding text and/or graphics is ~~formed~~printed on a card and wherein said device further includes a card storage magazine.
10. (Currently amended) An electronic text and/or graphics presentation device according to claim 2, wherein the pattern encoding text and/or graphics is ~~formed~~printed on a card and wherein said device further includes a card storage magazine formed in the second housing portion.
11. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the display means comprises a flexible LCD screen located across inner surfaces of the first and second housing portions.
12. (Original) An electronic text and/or graphics presentation device according to claim 11, wherein the flexible LCD screen is bi-stable.
13. (Original) An electronic text and/or graphics presentation device according to claim 3, including a recess for receiving a loop of a flexible LCD screen upon pivoting the first and second housing portions to a closed position in order that creasing of the LCD screen is avoided.

4

14. (Original) An electronic text and/or graphics presentation device according to claim 2 wherein first and second printed circuit boards are located in the first and second housing portions respectively.

15. (Original) An electronic text and/or graphics presentation device according to claim 14, wherein the flexible LCD screen may include conductive traces coupling the first and second printed circuit boards to each other.

16. (Original) An electronic text and/or graphics presentation device according to claim 1, wherein the user input control means comprises a joystick assembly.

17. (Currently amended) An electronic text and/or graphics presentation device including:

a scan head arranged to scan a printed pattern corresponding to text and/or graphics of an entire document;

a processor coupled to the scanner and configured to generate data corresponding to the text and/or graphics; and

a display screen responsive to the processor and arranged to receive the data from the processor and display the text and/or graphics.

18. (Currently amended) A method for distributing text and/or graphics comprising the steps of:

encoding the text and/or graphics of an entire document as a printed pattern on each one of a plurality of cards;

distributing the cards to a plurality of users; and

providing each of the users with an electronic text and/or graphics presentation device including means for converting the printed pattern into readable text and/or graphics and means for displaying the converted text and/or graphics.
